

Beam Production Package

We have designed a range of production packages which provide a cost effective yet professional alternative to bespoke production sets.

Our packages are designed to be used in a wide range of venues and locations and for ease of selection we have based the range on audience size:

- Arc - up to 60 people theatre style
- Beam - up to 120 people theatre style
- Curve - up to 200 people theatre style

We understand that larger events typically have specially chosen venues and so if your requirements differ to the capabilities of our packages, we are pleased to offer a bespoke service.

The **Beam** production system is ideal for larger meetings and smaller conferences.

Audience Size

Up to 120 delegates theatre style.

Venue Suitability

Suitable for most venues as it can run using rear projection or front projection to maximise on audience space.

Requirements

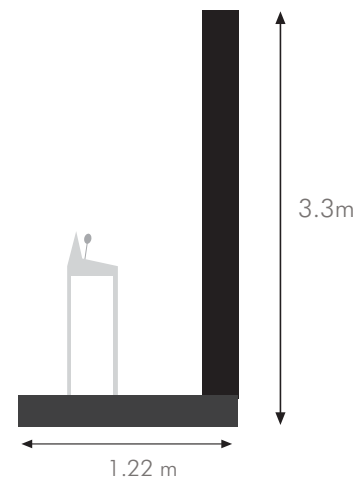

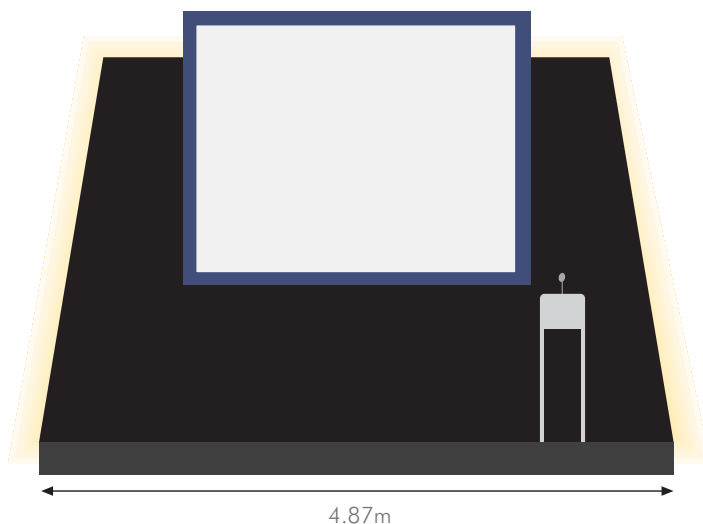

- Build time is a minimum of 3 hours.
- Pack down is a minimum of 1.5 hours.

Screen Size

A framed screen 2.44m x 1.83m.

Package price £1,995.00 ex VAT

Equipment included in the **Beam** production package is as follows:

Project Management

The package covers all pre-production requirements, site visits and liaison with the venue, as well as a dedicated account manager throughout the project.

Set

An effective set framing the central screen 2.44m x 1.83m (8ft x 6ft) with the flexibility to place the projector behind the set for a clean unobstructed view, or front projection if you are working in a tighter space.

Visual

2500 lumens, professional high powered data/video projector with stand, fitted with a short throw lens which minimises the distance from projector to screen, maximising audience space.

Lighting

- 2 x focused spot profile lanterns, to focus light onto defined areas of the stage, without 'bleeding' onto the screen.
- 2 x tripods for hanging lights.

Transport, Power & Crew

- Included is transport and trucking within 20 mile radius of High Wycombe (covering most of London).
- Power distribution and full installation and removal.
- 2 x crew/technicians.

Stage

A solid carpeted stage 4.87m wide x 1.22m (16ft x 4ft) deep, complete with a step. The stage is a 0.3m (1ft) high, ensuring your audience has a good sight line and the speakers are visible. The stage is finished with a black material valance around its base.

Sound

A high quality sound system comprising of:

- 2 x speakers with tripods and amplification
- 1 x CD player.
- 1 x mixer.

Lectern

Especially designed to hold a laptop or notes without obscuring the speaker.

Microphones

- 2 x lapel radio microphones (clip on microphones for presenters).
- 1 x hand held radio microphone (suitable for voice-overs, question and answer sessions or simply as a back up).
- Lectern microphone.
